

Traditional tools

Plants were sustainably used to make tools for everyday life. Only what was needed was taken and nothing was wasted. When an item was finished being used it was returned to the earth to breakdown naturally.

Use the signs in the Talking Huts to learn about traditional tools. Draw an example of a women's tool or a men's tool in the space below. Label what it was used for.

SYDNEY  ZOO

Stage 3 Survival and sustainability

NAME:

Use the cultural signs in the Australia precinct to find the answers to the following questions.

What role does fire play in traditional land management?

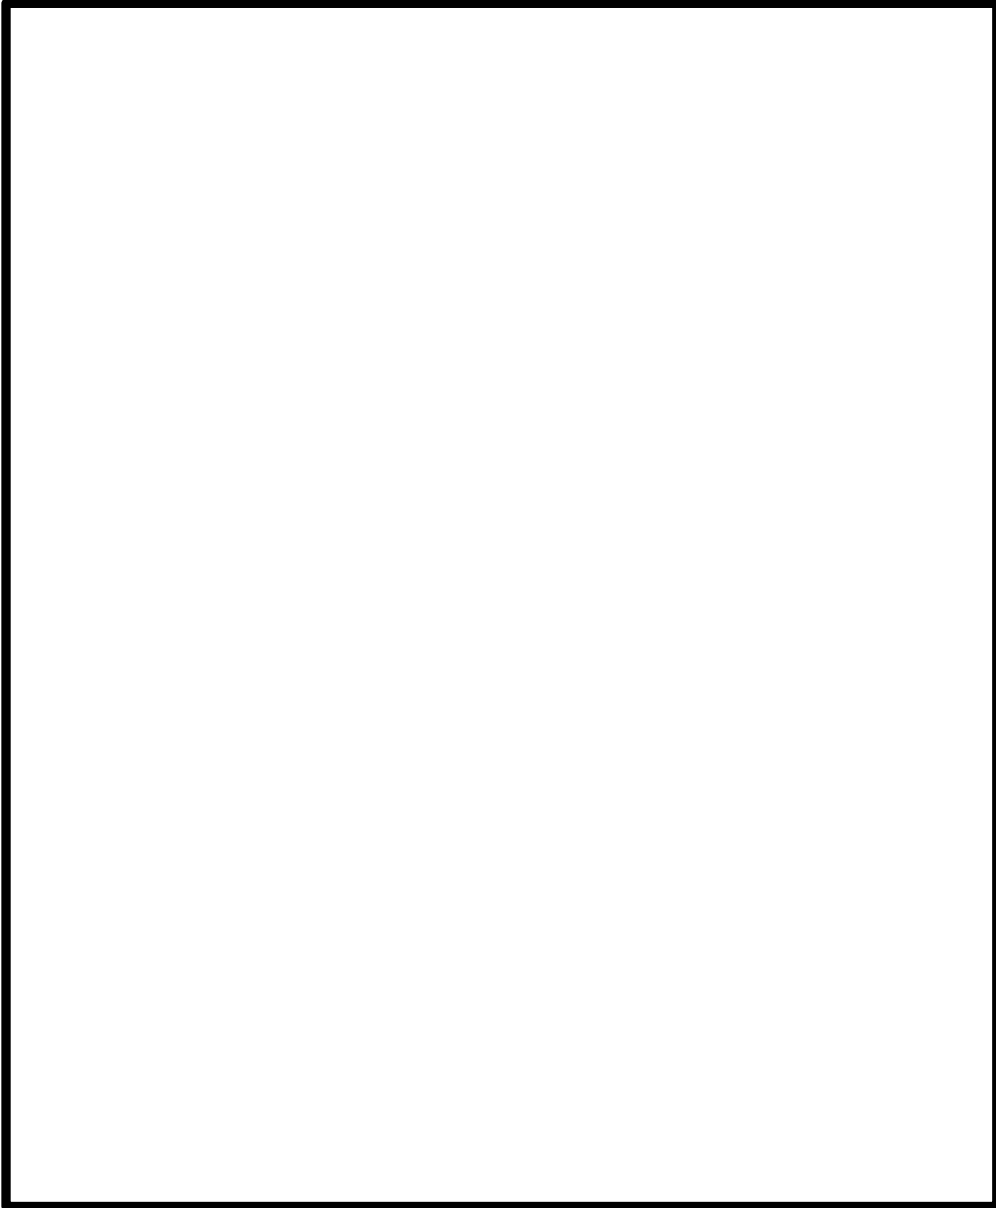

Why were animals not hunted during particular times of the year?

Give an example of a seasonal indicator.

Astronomy

Describe or illustrate how the Darug people use the night sky to sustainably live on Country. Provide an example.

Totems

Describe or illustrate the role totems play in living sustainably on Country. How do you think these totems were traditionally cared for?
